

# SPŠE JEČNÁ TEST CASE – Projekt Databáze

## Test Case ID: DB-01

Test Name: Verify launch and basic app settings.

Description: Tests if the app works as intended.

Pre-conditions: Downloaded MS SQL Server and SSMS.

Requirements: A working PC with Windows, from at least 2015.

Test priority: High

Step	Test steps	Test data	Expected result	Notes
1	Create the database. Launch: create-database.sql in your DB server, using SSMS	-	The schema is created	You should use MS SQL Server 2022
2	Edit App.Config	Connection string to your DB	Nothing happens	Must be correct
3	Launch the app	-	The window opens	
4	Click the button „Doprava – použít připojení z App.config“		Another Window appears	
5	Enter credentials for any database in the MainWindow, click „připojit k databázi“	Any database	Editing window appears	
6	Click „zavřít aplikaci“	-	All windows close
